Mission, Vision, Quality, Sustainability & Value Proposition (EN)

MISSION (EN)

Our mission is to provide world-leading, highly automated manufacturing solutions for medical single-use devices. We combine German engineering excellence with international system expertise and strong local execution capabilities in China and India.

VISION (EN)

We aim to become the global competence hub for medical manufacturing systems within the GMT Group, working as one international engineering team across Germany, China, and India.

QUALITY POLICY (EN)

Customer satisfaction, ISO standards, first-time-right mindset, continuous improvement, high reliability, and strong commitment to deadlines and performance.

SUSTAINABILITY (EN)

Resource efficiency, durable systems, local value creation (“Local for Local”), digital process optimization, and responsible long-term growth.

VALUE PROPOSITION (EN)

We provide our customers with a decisive competitive advantage: precise automation, data-driven process control, and equipment that delivers top performance throughout its entire lifecycle. Our global engineering and service teams ensure every solution is reliable, fully validatable, and economically efficient over the long term.
